

MP-3

These ruggedly built, economically priced shrink packaging systems are available in three different versions to suit your production needs. The Maxipak series uses quality, brand name components and features Damark quality craftsmanship that is synonymous with shrink packaging.

MP-1

This entry level, table top system is designed to operate in low level production settings (speeds of 4-6 packs per minute).

MP-2

This unit is designed to operate in medium level production settings (speeds of 8-10 packs per minute).

MP-3

This unit is designed to offer production speed outputs (10-12 packs per minute).
