

Audion Pronto

Wall or Table Mount Sealer

The Audion Pronto is a flexible poly bag sealer that can be mounted to a wall or a table. This poly bag sealer can be used in areas where space is limited or where the bag needs to be held upright during sealing (such as with liquids). The Audion Pronto is extremely easy to operate, once the bag is in place, the seal cycle starts by pushing on the back plate. As this sealer uses impulse for sealing, no warm-up time is required when sealing poly bags.

The Audion Pronto includes a 2 year limited warranty.
